THE ART OF FRENCH PERFUMERY, COSMETIC & FOOD FLAVOURING

Perfumery, Cosmetic and Food Flavouring is an art «à la française» and part of a lifestyle that “inspires dreams”.

French perfumery is at the heart of science and art: the person who creates a perfume is known as a “nose” in the industry.

Beyond the mastery of this art «à la française», this unique French savoir-faire opens up to a world and a lifestyle image that “inspires the global consumer to dream”.

For over 50 years, ISIPCA has created teaching methods specific to perfumery, cosmetic and food flavouring.

It combines both the sensory, the scientific and French savoir-faire.

ISIPCA is at the heart of an industrial sector that includes research know-how, packaging design and manufacturing of a large proportion of French cosmetics companies. Students and professionals who are passionate about the world of cosmetics and fragrance «à la française», come learn, discover, experiment and create with our teams of trainers !

ISIPCA opens its 9th Summer School :

A fun educational method based on workshops, lectures helps you discover this unique French approach to the world of perfumery, cosmetics and food flavouring ; one which highlights the pleasure of the senses and the passion for products steeped in history and a strong tradition of perfection.

The training is in the form of seven independent and complementary courses :

- 10 days on perfumery initiation (“Art of French Perfumery”)
- 5 days in advanced perfumery composition (“Advanced Perfumery Composition”)
- 5 days in perfume product development
- 10 days on cosmetic initiation (“Art of French Cosmetics”)
- 5 days in advanced cosmetic formulation
- 10 days on perfume and cosmetic initiation (“Perfume and Cosmetic Essentials”)
- 10 days on art of food flavoring «à la française»

At the end of the course, participants will be awarded a ISIPCA certificate.

We also propose distance learning training perfumery, cosmetic and flavor.
There is also a maximum number of participant per summer school.

MISSION HANDICAP

Our campus complies with regulations on accessibility for people with disabilities.
